Interior Landscaping

The clean modern styling of IOTA planters suits today's interiors, and their quality and standard of finish allows for a natural transition from outdoors to in.

In particular our tall tapered styles showcase a plant to maximum advantage, and act as a design feature in their own right.

All planters can now be supplied sealed watertight for use indoors, and for many items a matching tray or saucer is available.

Lexington planters

A range of large, architectural planters with a metropolitan feel, made in lightweight GRP.

Narrow Taper Large, Anthracite
